SALES AND DISTRIBUTION

STOCK:

- For immediate customer needs, pipes and fittings are available in stock at our authorized distributors in importing countries,
- The majority of distributors carry the entire product line in all sizes and materials.
- Items that are not available from your local distributors may be purchased from another of our distributors in a neighboring country or may be supplied from our warehouse upon their request.
- The goal is to make our products deliverable immediately, at competitive prices, and at the location closest to the customer.

PROJECTS:

- Project sales have grown to be a significant part of our business.
- With shorter delivery times and competitive pricing, we have been able to substantially boost our project sales.
- Ongoing or a project in initial stages, we provide the best offer to our clients,
- Special items such as large sizes, high wall thicknesses and exotic materials that are not practical to stock and easy to produce, are opportunities that we accept as a challenge for production and delivery,
